

SORAA EARNS ENERGY STAR® DISTINCTION

SORAA PRODUCTS ARE THE FIRST FULL-VISIBLE-SPECTRUM LEDs TO ATTAIN ENERGY STAR QUALIFICATION

Eight of SORAA's most popular MR16 products have been recognized with the ENERGY STAR qualification from the U.S. Environmental Protection Agency (EPA). These six products are the first full-visible-spectrum LEDs to attain this label.

THE ENERGY STAR STAMP OF APPROVAL

The ENERGY STAR label certifies that SORAA's MR16 products have met the stringent energy efficiency standards and performance criteria established by the EPA. SORAA products already qualify for a wide range of rebate programs based on their superior color rendering and energy efficiency. With the ENERGY STAR label, SORAA's LED lamps now qualify for additional utility rebate programs nationwide.

BEAUTIFUL EFFICIENCY

The superior performance of SORAA'S GaN on GaN™ LED technology enables products that are not only highly energy efficient, but also produce full-visible-spectrum light, making them the simply perfect choice for illuminating any environment. Consumers don't need to settle for "good-enough" light quality. SORAA's beautiful and energy-efficient lighting means settling for nothing less than the best.

THE SORAA DIFFERENCE

All SORAA LED lamps feature violet emission with 3-phosphors that enable benefits such as VP³ (VIOLET 3-PHOSPHOR) NATURAL WHITE and VP³ VIVID COLOR which reveal the magic of whiteness and colors in every environment, and POINT SOURCE OPTICS for uniform beams of high intensity. Now, SORAA'S SIMPLY PERFECT™ LIGHT comes with the ENERGY STAR stamp of approval.
